Professional Summary

Computer Engineering graduate with hands-on experience in **data analysis, SQL, and Python**, focused on turning raw data into actionable business insights. Proficient in **Exploratory Data Analysis (EDA)**, statistical analysis, Excel-based reporting, and dynamic visualization using **Matplotlib and Seaborn**. Experienced with relational databases (**MySQL, PostgreSQL**) and cross-functional collaboration. Strong communicator with a track record of delivering clean, well-documented analytical work.

Education

Terna Engineering College, Mumbai University	2022 – 2026
B.E. in Computer Engineering	CGPA: 7.35
Shiravane Vidyalaya & Jr. College	2022
Higher Secondary Certificate (HSC)	76.5%
Shiravane Vidyalaya	2020
Secondary School Certificate (SSC)	73%

Experience

AI Engineer Intern — <i>HealthFirstPriority (HFP)</i>	Sept 2025 – Dec 2025
- Assisted in AI and data-related tasks involving structured datasets, reporting, and workflow analysis. - Evaluated AI-based application performance using Python testing scripts and documented findings. - Collaborated with development teams to improve data handling pipelines and operational workflows. - Maintained organized technical documentation and supported monitoring and observability activities.	

Projects

HealthFirstPriority Distributed AI Platform	<i>Python · SQL · React JS · PostgreSQL</i>
- Worked on a distributed AI-powered platform focused on handling structured data, reporting workflows, and backend integrations. - Assisted in processing and managing application data using Python and PostgreSQL databases. - Contributed to frontend integration and responsive interface improvements using React JS. - Participated in debugging, workflow monitoring, and improving overall application performance and usability.	
AI Honeypot Analytics	<i>Python · PostgreSQL · Network Monitoring</i>
- Developed a monitoring system to capture, store, and analyze suspicious network activities and attack patterns. - Processed network log data using Python scripts and maintained structured records in PostgreSQL databases. - Generated analytical reports identifying repeated intrusion attempts and anomalous traffic behavior. - Organized monitoring datasets with filtering and querying mechanisms for efficient analysis and reporting.	
Railway Concession Management System	<i>HTML · CSS · JavaScript · Database</i>
- Built a web-based system to automate railway concession request and admin approval workflows. - Implemented authentication, digital verification, and centralized record management modules. - Reduced manual processing overhead through database integration and improved accessibility for students. - Designed responsive frontend pages for both student-facing and admin-facing operations.	

Technical Skills

Languages	Python, SQL, C, Java, JavaScript
Web	HTML, CSS, React JS
Libraries	Pandas, NumPy, Matplotlib, Seaborn
Tools	Git, GitHub, MS Excel
Databases	MySQL, PostgreSQL
Core Skills	Data Analysis, EDA, Data Cleaning, Report Generation, Debugging, Problem Solving

Additional Information

- Strong analytical thinking, written communication, and structured problem-solving abilities.
- Comfortable working in fast-paced, collaborative environments with cross-functional teams.
