## PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with hands-on experience building full-stack and backend applications using Python, FastAPI, Go, React, and PostgreSQL. Experienced in designing scalable APIs, distributed AI systems, database-driven applications, and AI-integrated solutions with strong fundamentals in DSA, OOP, DBMS, and Software Engineering.

## TECHNICAL SKILLS

|                     |                                                    |
|---------------------|----------------------------------------------------|
| <b>Languages</b>    | Python, Go, SQL, JavaScript, TypeScript, C         |
| <b>Backend</b>      | FastAPI, Go, Node.js (Basics), REST APIs, SSE      |
| <b>Frontend</b>     | React.js, Next.js, HTML, CSS, Tailwind CSS         |
| <b>Databases</b>    | PostgreSQL, MySQL, SQLite, Firebase, Supabase      |
| <b>AI/LLM</b>       | RAG, Prompt Engineering, LLM APIs, Agentic Systems |
| <b>Cloud/DevOps</b> | AWS, DigitalOcean, Caddy, Tailscale, Vercel, Linux |
| <b>Tools</b>        | Git, GitHub, Postman, VS Code                      |

## EXPERIENCE

### AI Engineer Intern

Sept 2025 – Feb 2026

*HealthFirstPriority (HFP)*

- Built and tested backend modules for an AI-powered application, developing Python code across 15+ core backend features.
- Integrated AI functionality using REST APIs and relational databases while collaborating with a team of 4 developers.
- Debugged and optimized distributed backend components, resolving 15+ issues and improving API response time by approximately 30%.
- Contributed to backend architecture, API design, database optimization, and scalable workflow implementation.

## PROJECTS

### MeshMind – Distributed AI Platform (Live Demo)

*Python, FastAPI, Go, PostgreSQL, Next.js*

- Built a distributed AI-powered clinical assistant platform with 20+ REST API endpoints using FastAPI, Go middleware, PostgreSQL, and Next.js.
- Designed distributed inference using Caddy load balancing, Tailscale VPN mesh networking, and multiple AI worker nodes.
- Developed Retrieval-Augmented Generation (RAG), semantic search, JWT authentication, and real-time AI response streaming.
- Improved backend performance through API optimization, modular architecture, and efficient database queries.

### ServiceTrack – Document & Task Management (Live Demo)

*React, Vite, Google Sheets API, PDF Generation*

- Built a Document Center and task management platform using React and Vite, using Google Sheets as a live backend data store.
- Designed a synchronized caching layer to keep task and customer data consistent with Google Sheets in real time.
- Implemented automated PDF receipt generation to streamline transaction documentation for customer records.

### EchoAI Avatar (GitHub)

*React, TypeScript, FastAPI, Web Speech API*

- Built an AI-powered voice chatbot with a custom animated avatar, integrating speech recognition, LLM responses, and text-to-speech.
- Implemented Server-Sent Events (SSE) for real-time streaming with approximately 1 second first-response latency.
- Focused on smooth Canvas rendering and micro-interactions to create a low-latency, immersive conversational UI.

### Traxos – Finance Tracker (GitHub)

*React, TypeScript, Tailwind CSS, Supabase*

- Built a full-stack personal finance management app with secure authentication and full CRUD operations.
- Designed the Supabase (PostgreSQL) schema and optimized queries for transaction management and expense categorization.
- Built an interactive dashboard with dark mode and data visualization charts for a seamless mobile experience.
- Improved SEO performance and Google search ranking for Traxos and personal portfolio through on-page optimization, structured metadata, and Google Search Console monitoring.

### AI Adaptive Cyber-Honeypot

*Python, FastAPI*

- Designed an AI-driven deception platform to detect, analyze, and log malicious network activity, simulating multiple attack scenarios.
- Integrated offline LLM-based threat analysis, logging, and monitoring.

## EDUCATION

### Terna Engineering College, Mumbai University

2022–2026

Bachelor of Engineering, Computer Engineering — CGPA: 7.5

*Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering*
