PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with hands-on experience in software development, full-stack web applications, AI-powered systems, and data analytics. Proficient in Python, Java, SQL, and JavaScript with a strong foundation in Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), and Software Development Life Cycle (SDLC). Experienced in building applications, working with APIs, databases, cloud deployment platforms, and data analysis tools.

EDUCATION

Terna Engineering College, Mumbai University 2022–2026
Bachelor of Engineering (Computer Engineering) CGPA: 7.5

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

AI Engineer Intern Sept 2025–Dec 2025
HealthFirstPriority (HFP)

- Assisted in developing and testing AI-powered application modules and backend workflows.
- Collaborated with developers to integrate AI-based features and improve application functionality.
- Participated in debugging, performance analysis, and system optimization activities.
- Worked with APIs, databases, and distributed application components.

PROJECTS

MeshMind Distributed AI Platform *Python · FastAPI · PostgreSQL · React*

- Developed a distributed AI-powered clinical assistant platform using Python, FastAPI, PostgreSQL, and React.
- Applied OOP principles to design modular and maintainable backend components.
- Utilized DBMS concepts for database design, querying, authentication, and secure data management.
- Improved system performance through API integration, debugging, and structured workflows.

EchoAI Avatar *GitHub*

- Developed an AI-powered voice chatbot with speech recognition and text-to-speech functionality.
- Applied OOP principles to build modular and reusable application components.
- Integrated LLM APIs to generate dynamic conversational responses in real time.
- Implemented real-time communication using Server-Sent Events (SSE).

Traxos Finance Tracker *GitHub*

- Built a full-stack finance management application for tracking income and expenses.
- Applied DBMS concepts for secure data storage, retrieval, and transaction management.
- Implemented authentication, CRUD operations, and responsive interfaces using React.
- Improved application usability through efficient workflow and data organization.

AI Adaptive Cyber-Honeypot *Python · System Architecture*

- Designed and engineered an in-app deception layer leveraging Python to detect and study malicious network behavior.
- Applied advanced problem-solving skills to build logical architectures and implement synthetic data generation for proactive software analysis.

TECHNICAL SKILLS

Languages	Python, Java, SQL, JavaScript, C
Frontend	HTML, CSS, React.js
Backend	FastAPI, Node.js (Basics), REST API Fundamentals
Databases	PostgreSQL, MySQL, Firebase, Supabase
Data Analytics	Pandas, NumPy, Data Cleaning, EDA, Excel
Tools	Git, GitHub, Postman, Vercel, VS Code
Concepts	OOP, DBMS, Linux, ML, Problem Solving, API Integration
AI/ML	LLMs, Prompt Engineering, Agentic Systems, Distributed Inference, General ML
