PROFESSIONAL SUMMARY

Computer Engineering graduate (2026) with hands-on experience in software development, full-stack web applications, AI-powered systems, and data analytics. Proficient in Python, Java, SQL, and JavaScript with a strong foundation in Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), and Software Development Life Cycle (SDLC). Experienced in building applications, working with APIs, databases, cloud deployment platforms, and data analysis tools.

EDUCATION

Terna Engineering College, Mumbai University	2022 – 2026
Bachelor of Engineering (Computer Engineering)	CGPA: 7.35

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

AI Engineer Intern	Sept 2025 – Dec 2025
<i>HealthFirstPriority (HFP)</i>	

- Assisted in developing and testing AI-powered application modules and backend workflows.
- Collaborated with developers to integrate AI-based features and improve application functionality.
- Participated in debugging, performance analysis, and system optimization activities.
- Worked with APIs, databases, and distributed application components.

PROJECTS

HealthFirstPriority Distributed AI Platform	<i>Python · FastAPI · PostgreSQL · React</i>
--	--

- Developed a distributed AI-powered clinical assistant platform using Python, FastAPI, PostgreSQL, and React.
- Applied OOP principles to design modular and maintainable backend components.
- Utilized DBMS concepts for database design, querying, authentication, and secure data management.
- Improved system performance through API integration, debugging, and structured workflows.

EchoAI Avatar	GitHub
----------------------	--------

- Developed an AI-powered voice chatbot with speech recognition and text-to-speech functionality.
- Applied OOP principles to build modular and reusable application components.
- Integrated LLM APIs to generate dynamic conversational responses in real time.
- Implemented real-time communication using Server-Sent Events (SSE).

Traxos Finance Tracker	GitHub
-------------------------------	--------

- Built a full-stack finance management application for tracking income and expenses.
- Applied DBMS concepts for secure data storage, retrieval, and transaction management.
- Implemented authentication, CRUD operations, and responsive interfaces using React.
- Improved application usability through efficient workflow and data organization.

Face Recognition Attendance System	GitHub
---	--------

- Developed an automated attendance management system using Python and OpenCV.
- Applied DSA concepts for efficient facial data processing and record management.
- Integrated database storage for attendance tracking and retrieval.
- Automated attendance processing and reduced manual effort.

TECHNICAL SKILLS

Languages	Python, Java, SQL, JavaScript, C
Frontend	HTML, CSS, React.js (Fundamentals)
Backend	FastAPI, Node.js (Basics), REST API Fundamentals
Databases	PostgreSQL, MySQL, Firebase, Supabase
Data Analytics	Pandas, NumPy, Data Cleaning, EDA, Excel, Power BI
Tools	Git, GitHub, Postman, Vercel, VS Code
Concepts	OOP, DSA, DBMS, SDLC, Problem Solving, API Integration
